

Bicycle Therapeutics Announces Presentation at the Royal Society

October 17, 2018

CAMBRIDGE, U.K., and BOSTON, Mass., October 17, 2018 – Bicycle Therapeutics, a biotechnology company pioneering a new class of therapeutics based on its proprietary bicyclic peptide (*Bicycles*®) product platform, announced that Chief Executive Officer Kevin Lee, Ph.D., will give a presentation at the “Delivery of Novel Therapies in the 21st Century” conference, hosted by the Royal Society and Academy of Medical Sciences’ FORUM programme.

Dr. Lee will describe Bicycle’s breakthrough technology as well as its progress in advancing its robust pipeline of preclinical and clinical therapeutics for cancer and other diseases.

The conference will be held on October 24-25, 2018 at the Royal Society in London.

About Bicycle Therapeutics

Bicycle Therapeutics is developing a unique class of chemically synthesised medicines based on its proprietary bicyclic peptide (*Bicycle*®) product platform to address therapeutic needs unreachable with existing treatment modalities. Bicycle’s internal focus is in oncology, where the company is developing targeted cytotoxics (*Bicycle Toxin Conjugates*®), targeted innate immune activators and T-cell modulators for cancers of high unmet medical need. *Bicycles*’ small size and exquisite targeting deliver rapid tumour penetration and retention while clearance rates and routes of elimination can be tuned to minimise exposure of healthy tissue and bystander toxicities. The company’s lead program, BT1718, is being evaluated in a Phase I/IIa trial in collaboration with Cancer Research UK. The company’s unique intellectual property is based on the work initiated at the MRC Laboratory of Molecular Biology in Cambridge, U.K., by the scientific founders of the company, Sir Gregory Winter, a winner of the Nobel Prize in Chemistry for his pioneering work in phage display of peptides and antibodies, and Professor Christian Heinis. Bicycle has its headquarters in Cambridge, U.K., with many key functions and members of its leadership team located in the biotech hub of Boston, Mass.
