

## **Bicycle Therapeutics to Present Updated Data from Phase I/IIa Trial Evaluating Lead Asset BT1718 in Patients with Advanced Solid Tumors at ESMO 2019 Annual Congress**

September 24, 2019

CAMBRIDGE, England & BOSTON--(BUSINESS WIRE)--Sep. 24, 2019-- [Bicycle Therapeutics plc](#) (NASDAQ: BCYC), a biotechnology company pioneering a new class of therapeutics based on its proprietary bicyclic peptide (*Bicycles*<sup>®</sup>) product platform, today announced that updated data from the Phase I dose escalation portion of the Phase I/IIa trial evaluating the Company's lead asset BT1718 in patients with advanced solid tumors will be presented at the European Society of Medical Oncology (ESMO) 2019 Annual Congress, September 27 – October 1 in Barcelona, Spain.

Details for the poster presentation are as follows:

Session Title: Poster Session 2

Location: Poster Area (Hall 4)

Poster Presentation Title: Pharmacokinetic (PK) assessment of BT1718: A phase 1/2a study of BT1718, a first in class Bicycle Toxin Conjugate (BTC), in patients (pts) with advanced solid tumors

Abstract #: 5764

Date & Time: September 28, 2019, 12:00 p.m. – 1:00 p.m. CET

### **About Bicycle Therapeutics**

Bicycle Therapeutics (NASDAQ: BCYC) is a clinical-stage biopharmaceutical company developing a novel class of medicines, referred to as *Bicycles*<sup>®</sup>, for diseases that are underserved by existing therapeutics. *Bicycles* are fully synthetic short peptides constrained with small molecule scaffolds to form two loops that stabilize their structural geometry. This constraint facilitates target binding with high affinity and selectivity, making *Bicycles* attractive candidates for drug development. Bicycle's lead product candidate, BT1718, is a *Bicycle* Toxin Conjugate being investigated in an ongoing Phase I/IIa clinical trial in collaboration with the Centre for Drug Development of Cancer Research UK. Bicycle is headquartered in Cambridge, UK with many key functions and members of its leadership team located in Lexington, MA.
