

Bicycle Therapeutics to Participate in a Panel Discussion at the Canaccord Genuity Horizons in Oncology Conference

April 6, 2020

CAMBRIDGE, England & BOSTON--(BUSINESS WIRE)--Apr. 6, 2020-- <u>Bicycle Therapeutics plc</u> (NASDAQ: BCYC), a biotechnology company pioneering a new and differentiated class of therapeutics based on its proprietary bicyclic peptide (*Bicycles®*) technology, today announced that management will participate in a panel discussion on bispecifics at the Canaccord Genuity Horizons in Oncology Conference on Wednesday, April 8, 2020 at 10:15 a.m. ET. The conference will be held in a virtual meeting format.

A live webcast of the panel will be accessible in the Investors & Media section of Bicycle's website at www.bicycletherapeutics.com. An archived replay of the webcast will be available for 60 days following the presentation date.

About Bicycle Therapeutics

Bicycle Therapeutics (NASDAQ: BCYC) is a clinical-stage biopharmaceutical company developing a novel class of medicines, referred to as *Bicycles*[®], for diseases that are underserved by existing therapeutics. *Bicycles* are fully synthetic short peptides constrained with small molecule scaffolds to form two loops that stabilize their structural geometry. This constraint facilitates target binding with high affinity and selectivity, making *Bicycles* attractive candidates for drug development. Bicycle's lead product candidate, BT1718, a *Bicycle* Toxin Conjugate (BTC) that targets MT1-MMP, is being investigated in an ongoing Phase I/IIa clinical trial in collaboration with the Centre for Drug Development of Cancer Research UK. Bicycle is also evaluating BT5528, a second-generation BTC targeting EphA2, in a Company-sponsored Phase I/II study. Bicycle is headquartered in Cambridge, UK with many key functions and members of its leadership team located in Lexington, MA. For more information, visit bicycletherapeutics.com.
